

ACCESSIBLE SPACES FOR ALL

Improving accessibility of tourism for persons with disabilities in Central Europe

CE-Spaces4All

Challenges

Remote rural border regions with less economic opportunities.

Lack of proper regional territorial planning and governance for persons with disabilities, awareness about their needs.

Lack of accessible tourism, services and standardised data for persons with disabilities.

Project objectives

To improve **governance, better territorial planning and cooperation of multi-level cross-sectoral stakeholders.**

Participatory and capacity raising process, connecting persons with disabilities, public authorities and tourism stakeholders.

Big potential for the **implementation of accessible tourism** for persons with disabilities and to improve **employability and development** in transborder areas.

Better **quality of life** for persons with disabilities (mobility, employment, social inclusion).

Main outputs and solutions

- 1 Web accessibility viewer for accessible tourism.
- 2 Pilot actions to jointly develop and test solutions and services for independent and safe travel of people on wheelchairs and blind and visually impaired in 3 pilot regions.
- 3 Joint strategy on territorial planning for accessible tourism.
- 4 Action plans for improving accessibility of tourism in the transborder tourism regions.

Cooperation

Involvement of persons with disabilities is essential for project objectives and goals.

Exchange of knowledge, practices and participatory co-development of solutions.

Common approach for collecting data will improve governance for accessible tourism, territorial tourism strategies, develop services for persons with disabilities, capacity building and policy integration.
